Kentucky High School Feedback Report

The Kentucky High School Feedback Report provides valuable data to secondary and postsecondary educators about the performance of students in the state's public educational system. CPE, the Kentucky Department of Education, and the Kentucky Higher Education Assistance Authority, with data from ACT Inc., and The College Board, collaboratively produced the report.

The feedback report is used to increase communication between high schools and the public postsecondary institutions, supply high schools with information regarding their graduates' readiness for postsecondary education, and encourage educators to develop partnerships to ensure that students are prepared to enroll in colleges and universities across the Commonwealth.

The report includes information about the high school success, college preparation, college-going, and academic performance of those who enrolled in postsecondary institutions after high school. Information is divided into the following categories:

- Basic information About the 2006 class
- Student performance on the ACT
- In-state enrollment in postsecondary education
- Identification of the institutions students entered
- College majors

Reports are available for all Kentucky high schools where more than four graduates took the ACT and enrolled in a participating Kentucky college. The most recent High School Feedback Report will be available on the Council's Web site this summer. The Council's information and research staff will discuss the upcoming report at the February 16 meeting.
